OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist the Newport Army Ammunition Plant (NAAP) in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections. The MCX did not physically verify the existence of collections and, as such, the information contained in this report is based on background record reviews and information obtained via telephone interviews with the aforementioned installation personnel and institution professionals.

Archival research for NAAP began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Division of Historic Preservation and Archaeology, Indianapolis, Indiana, and the Glenn A. Black Laboratory of Archaeology, Bloomington, Indiana. The records search was performed at these facilities in July 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. A draft Section 6 Summary letter is enclosed (Appendices I-IV), as well as a listing of the current tribal chairpersons who need to be contacted (Appendix V).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT NAAP

Archaeological work on the NAAP began in 1982. These archaeological investigations were conducted by three major groups and included the collecting of artifacts. These groups are:

Ball State University, Muncie, Indiana
Indiana State University Anthropology Laboratory (ISUAL), Terre Haute, Indiana
U.S. Army Corps of Engineers (USACOE), Environmental Analysis Branch,
Louisville, Kentucky

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

An approximate total of < 6.5 ft³ of boxed archaeological materials and associated documentation has been identified for the NAAP. Artifacts recovered include Euro-American historic objects of glass, ceramic, metal, leather, brick, concrete, and animal bone as well as prehistoric stone waste flakes, various stone tools, ceramics, fire-cracked rock, and animal bone. As of September 1995, these collections were reported to be located in the following three repositories:

Ball State University, Muncie, Indiana	3 ft ³ artifacts and documentation
ISUAL, Terre Haute, Indiana	< 2.5 ft ³ artifacts and documentation
USACOE, Louisville, Kentucky	< 1 ft ³ artifacts and documentation

The attached *Summary of Current Locations of Archaeological Collections from Newport Army Ammunition Plant* (Appendix VI) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (field notes, maps, photos, data analyses, correspondence, etc.), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to

locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA Related Materials

MCX research identified no human remains or funerary objects during its review of archaeological records, associated literature, and telephone interviews for Newport Army Ammunition Plant. The final determination of sacred objects or objects of cultural patrimony may be established through consultation with Native American tribes that have met the definition of culturally affiliated tribes and/or lineal descendants and for the objects specified by law in NAGPRA.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

One set of references regarding archaeological work conducted on NAAP is attached: Appendix VII contains the list of references reviewed by the MCX during its archival research. No references for the NAAP were found during the National Archeological Data Base (NADB) search for this installation.

NATIVE AMERICAN TRIBES ASSOCIATED WITH NAAP

Several Native American groups were adjudicated lands on or near NAAP in the 1978 Indian Lands Claims cases (U.S.G.S. n.d.). These groups are the Miami, Wea, Piankashaw, Kickapoo, Potawatomi, Delaware, and Shawnee. It is unclear whether or not any of these groups have aboriginal ties to the area in which NAAP is currently located, but each is addressed here due to their historical association with and/or claims to the region.

The Miami, Wea, and Piankashaw have been closely associated with the NAAP region in historic times (Reseigh 1982:27-28). In the early contact period, Miami-speaking tribes are known to have occupied areas of Michigan, Wisconsin, Illinois, and Indiana. The term Miami has been used historically to designate both a specific tribe and a group of related tribes, including the Wea and Piankashaw. In the early eighteenth century, the divisions between these groups became much clearer, and the Wea and Piankashaw retained distinct status and were recognized as independent tribes (Callender 1978b:681). Callender's map of tribal territories of these groups from the early eighteenth through the early nineteenth century depicts Wea tribal boundaries encompassing the area in which NAAP is currently located, while Miami and Piankashaw tribal territories are depicted northeast and south of Wea territory, respectively (Callender 1978b:Fig.1). The U.S.G.S. map of Indian Land Claims Judicially Established appears to reflect this historical association of these three groups with the NAAP region: the Wea and Kickapoo were jointly adjudicated lands currently occupied by the installation, while the

Piankshaw and Miami were adjudicated lands approximately seventy-five to one hundred miles south and west of the area, respectively (U.S.G.S. n.d.).

In the early nineteenth century, the Piankashaw and Wea sold their lands in Indiana and moved to Missouri. In 1846 the Miami were forcibly removed to Kansas, although about half the tribe managed to evade removal and remained in Indiana (Callender 1978b:687). By this time, the Wea and Piankashaw had also moved to Kansas where they united with the remnant of the Illinois under the name "Confederated Peoria" (Callender 1978a:679). The Confederated Peoria and the Miami in Kansas were removed to present-day Oklahoma in 1867. In Oklahoma, the Miami joined the Confederated Peoria and formed the "United Peoria and Miami Tribe" (Callender 1978b:681). Today, these groups are federally recognized as the Peoria Tribe of Oklahoma and the Miami Tribe of Oklahoma (Schilz 1994:442-443; Clark 1994:337-338). The Indiana Miami are not presently federally recognized (Clark 1994:337).

The Kickapoo, a group whose movements were so frequent and extensive that they cannot be associated with any one specific area, have joint adjudication of lands with the Wea in the area currently occupied by NAAP (U.S.G.S. n.d.). At the time of European contact, the Kickapoo were found in southern Wisconsin. By the mid-eighteenth century, the Vermillion band of Kickapoo were living along the western bank and tributaries of the Wabash River, the region in which NAAP is located (Callender et al. 1978:662; Reseigh 1982:28; Tanner 1987). Living with the Kickapoo in the region during this time were the Mascouten, who are known to have lived in southern Michigan and Wisconsin and in northern Indiana and Illinois during the early historical period. After considerable movement and population decline, they were absorbed by the Kickapoo after 1800 (Goddard 1978b:668-669). In 1819, Kickapoo lands were ceded to the U.S. government and by 1832 they were removed to Kansas. Eventually some Kickapoo bands moved into Oklahoma and Texas (Callender et al. 1978:656). There are three federally recognized Kickapoo groups in the United States today: the Kickapoo Tribe of Kansas, the Kickapoo Tribe of Oklahoma, and the Texas Band of Kickapoo (Stull 1994a:286).

The Potawatomi are believed to have originally inhabited the lower peninsula of Michigan, but have been associated with other areas of Michigan as well as portions of present-day Wisconsin, Illinois, Indiana, and Ohio (Clifton 1978:725-726). By 1800, Potawatomi territory included areas northeast and northwest of the NAAP area (Clifton 1978:Fig.1). By 1836, Potawatomi lands in Indiana had been ceded, and by 1840 most of their communities had been removed (Tanner 1987:137-138). In the 1978 Indian Lands Claims cases, the Potawatomi were adjudicated lands less than fifty miles from the area in which NAAP is located (U.S.G.S. n.d.). Although there are federally recognized and unrecognized groups of Potawatomi scattered throughout northern Indiana, as well as other states, the majority still live in Oklahoma and Kansas (Stull 1994b:464).

The Delaware began to migrate westward from their homelands in New York, New Jersey, Pennsylvania, and Delaware in the seventeenth century. At the time of this migration there were two communities of Delaware, the northern or Munsi-speaking and the southern or

Unami-speaking communities. During the eighteenth century Delaware tribal territories extended from New Jersey to the Ohio Valley (Goddard 1978a:Fig.1 and Fig. 2). During the late 1700s groups of western Delaware settled briefly in areas of Indiana, including along the White River in a region south and southwest of the NAAP area (Goddard 1978a:Fig. 5). The Unami Delaware purchased rights in the Cherokee Nation of Oklahoma in 1867 and obtained full Cherokee citizenship in 1890. Some of the Munsi-speaking Delaware are now living among the Stockbridge-Munsee of Wisconsin Tribe. Another group of Delaware lived with the Caddo in Texas until they were forced into Oklahoma in 1859. This group, the Delaware Tribe of Oklahoma, is the only federally recognized community of Delaware in the United States (Miller 1994:169). The Delaware were adjudicated a share of land less than fifty miles east of the NAAP region in the 1978 Indian Land Claims cases (U.S.G.S. n.d.).

The Shawnee have been an exceptionally fragmented people throughout historic times, and their frequent movements make it difficult to assign them to a specific area (Callendar 1978b:622). Groups of Shawnee have been documented as migrating through the NAAP region beginning in the late seventeenth century (Callendar 1978b:Fig.1). One group of Shawnee are known to have settled in the Wabash drainage in the general vicinity of NAAP during the late eighteenth and early nineteenth centuries. Today, there are three distinct Shawnee political entities in Oklahoma: the Absentee Shawnee, the Eastern Shawnee, and the Loyal Shawnee. However, only the Absentee Shawnee and Eastern Shawnee are federally recognized. Additionally, the Shawnee Nation United Remnant Band has received state recognition from Ohio (Neely 1994:584). The Shawnee have been adjudicated land in southern Ohio (U.S.G.S. n.d.).

The Miami, Wea, Piankashaw, Kickapoo, Potawatomi, Delaware, and Shawnee are represented by fifteen federally recognized tribal entities listed in Appendix V.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are draft NAGPRA Section 6 Summary letters and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendices I-V).

Fifteen tribes are federally recognized:

Absentee-Shawnee Tribe of Indians of Oklahoma
Cherokee Nation of Oklahoma
Citizen Band Potawatomi Indian Tribe of Oklahoma
Delaware Tribe of Western Oklahoma
Eastern Shawnee Tribe of Oklahoma
Forest County Potawatomi Community of Wisconsin Potawatomi Indians, Wisconsin
Hannahville Indian Community of Wisconsin Potawatomi Indians of Michigan
Kickapoo Tribe of Kansas
Kickapoo Tribe of Oklahoma
Kickapoo Traditional Tribe of Texas
Miami Tribe of Oklahoma
Peoria Tribe of Oklahoma
Pokagon Potawatomi Indians of Michigan
Prairie Band of Potawatomi
Stockbridge-Munsee Community of Mohican Indians of Wisconsin

The Huron Potawatomi of Michigan have petitioned for federal recognition and the Bureau of Indian Affairs published a proposed positive finding on 31 May 1995. They have nearly completed the process of seeking federal recognition (Bureau of Indian Affairs 1995).

The Match-E-Be-Nash-She-Wish Band of Pottawatomi Indians of Michigan (formerly the Gun Lake Village Band) have petitioned the Bureau of Indian Affairs for federal recognition and have been determined to be "Ready and Waiting for Active Consideration" (Bureau of Indian Affairs 1995).

The Munsee-Thames River Delaware of Colorado were denied recognition effective 3 January 1993 (Bureau of Indian Affairs 1995). The Miami Nation of Indians of Indiana was denied acknowledgment effective 17 August 1992, and the case is presently in litigation (Bureau of Indian Affairs 1995).

Other Indian groups have filed letters of intent to petition for federal recognition: Delaware-Muncie of Kansas, Delawares of Idaho, North Eastern U.S. Miami Inter-Tribal Council of Ohio, Upper Kispoko Band of the Shawnee Nation of Indiana, Piqua Sept of Ohio Shawnee Indians, United Tribe of Shawnee Indians of Kansas (Bureau of Indian Affairs 1995).

None of these tribes is federally recognized at present and therefore they do not, at present, fit the legal description of tribe as defined for NAGPRA purposes.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR THE MIAMI, KICKAPOO, POTAWATOMI, SHAWNEE, AND DELAWARE TRIBES

[Installation Header]

[Tribal POC Name]
[Title]
[Address]
[City, State, Zip]

Dear [Name of POC]:

I am writing to inform you of collections held by Newport Army Ammunition Plant (NAAP) that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the [Tribe]. The NAAP has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

NAAP is responsible for archaeological collections generated from surveys and/or excavations conducted from 1982 to the present. The collections consisted of historic and prehistoric objects. Historic Euro-American artifacts recovered included glass, ceramic, metal, leather, brick, concrete, and animal bone. Prehistoric objects such as stone waste flakes, various stone tools, ceramics, fire-cracked rock, and animal bone were also collected. No human remains or funerary objects have been identified our review of the records for these collections.

We are notifying [Tribe] because some of these materials were found in or near the area thought to be part of the territory occupied or used historically by the [Tribe]. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [installation POC] regarding any of these issues, at [telephone, address].

To facilitate discussions between the NAAP and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [installation POC] regarding any of these issues, at [telephone, address].

To facilitate discussions between the NAAP and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX VI

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM NEWPORT ARMY AMMUNITION PLANT, INDIANA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE:	The volume or number of objects in a collection, estimated by the repository POC or from project reports.
DESCRIPTION OF MATERIALS:	General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.
ANTIQUITY/ARCH. PERIOD:	Chronological or cultural-historical designations recorded on site records or in references specific to the collection.
CULTURAL AFFILIATION:	This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.
BASIS OF DETERMINATION:	Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).
SECTION 5 MATERIALS:	Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX VII

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, or in instances where the author is a company rather than an individual, the company name is listed here.
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
